**CONNECTED  
PRODUCT**

# A platform of smart products and interconnected systems.

**View is a unique platform that includes connected systems and products for new builds, refurbishments or to modernise existing systems.** It entails a combination of solutions designed to favour comfort, energy efficiency and security, with matching styling, along with products customised to match all architectural styles. These interconnected products and systems liaise with one another continuously and in a perfectly integrated way to provide a concrete solution to the needs of those who build and enjoy spaces.

**Our solutions respect the identity of each setting.** You can expand your ecosystem in a smart, simple and constant way, for total control of your home and of the building.

App View

**A single app:** a unique experience and a user-friendly interface. You can manage, control and create scenarios. You can integrate the app with the IFTTT platform to integrate third-party devices. With the View app and Vimar Cloud, you're connected to your spaces wherever you are and are always up-to-date on what's going on inside and outside the building. Simply connected to your world.

## Communicating is easy with **Elvox Video door entry systems.**

**Seeing what goes on outside the home, recognising those who ring our doorbell, even when we are out, and communicating accurately are all crucial operations for living a quiet life.** This is why we need access to sophisticated solutions based on innovative technology and a comprehensive range that can ensure the safety and clarity we require by simultaneously combining user-friendliness with a system that is simple to install.

### High-performance technology to multiply solutions.

**IP, SIP** and **Due Fili Plus** technologies can be easily used to create even large systems, guaranteeing the highest performance in any type of building, from small homes to large residential complexes. High-performance systems that are capable of accurately meeting all building requirements.

### A wide range of different indoor stations and outdoor stations.

An extensive selection of video entryphones, entryphones and outdoor stations for residential and service industry facilities. The products vary in dimensions, design, structure, type of system, smart and simple functions as well as installation. They all share the same superior structural quality, attention to design, easy installation and use.

## IP Technology, limitless.

**A system based on IP technology takes video door entry systems beyond their traditional limits:** increased performance with contemporary, multiple audio/video communication between indoor stations and outdoor stations and a potentially infinite number of users. All this is made completely simple, also through the use of existing LAN networks, without laying any specific wiring.

### Incomparable expansion.

With IP technology, the video door entry systems can be expanded to include a large number of users. Expansion is as easy and simple as initial installation: quick and functional, also through the use of dedicated or existing shared LAN networks, where present.

### Full coverage.

Performance is enhanced, and audio and video signal quality is guaranteed and protected, whatever the size of the building complex. For efficient, high-performance communication.

### Simple configuration.

Self-configuring for kits, or configurable using the Video Door IP Manager software from a PC for all installations, from the smallest to the most complex, all made simple by the autodiscovery function for Elvox IP video door entry system devices. Installation is always quick and functional, supporting the needs of professionals.

### Remote management by smartphone and tablet.

The restyled Video Door App allows you to receive a video entryphone call, see the video surveillance cameras or even open your door directly from your smartphone or tablet, wherever you are.

### Guaranteed reliability.

The system data is replicated on the different devices, ensuring constant system operation. Everything is guaranteed to be controlled efficiently at all times, and in the event of a system failure service is restored in just one minute.

### Scalability and versatility.

The IP video door entry system was designed to respond in the simplest way to the needs of all kinds of buildings: from single homes to large residential complexes.

## SIP technology, Session Initiation Protocol, for a multimedia communication.

**SIP (Session Initiation Protocol) is the most commonly used protocol in the VOIP telephony business market.** It is used to create audio or audio-video communication sessions between one or more participants. These sessions include Internet phone calls (VOIP).

**Compatibility.**

The range is compatible with the products of world leaders in the VOIP telephony sector.

**Installation context.**

Suited for solutions in any context where there is a SIP server.

**Simple configuration.**

Commissioning can be done simply from any browser, connecting to the WEB server of the device, without the need for specific software.

**Call scenarios.**

- Call to a SIP audio device.
- Call to a SIP audio/video device, with or without preview depending on the features.
- Output activation via DTMF.

**Software licences.**

- They enable calls from the entrance panel to one or more SIP audio devices.
- They enable calls from the entrance panel to one or more SIP audio/video devices.

## Due Fili Plus technology, quick and flexible.

**Due Fili Plus technology is used to create high-performing video entryphone and entryphone communication systems** in all types of building, whether new builds or refurbishments, in the simplest possible way. Due Fili Plus technology guarantees faultless connections between all devices used for receiving and transmitting power, audio/video and data signals.

### Up to 6400 indoor stations.

With Due Fili Plus technology, systems are designed to handle up to a maximum of **484 outdoor stations** and up to **6400 indoor stations**. With the **expansion interface**, you can expand the system by replicating several Due Fili Plus systems with **up to 32 blocks** and **128 reception video-switchboards**.

### Up to 1200 metres.

Due Fili Plus technology can be used to create extended systems, with a distance between the indoor station and outdoor station of up to **1200 metres, without losing any audio or video signal quality**. The signal is carried along a single, small-diameter twisted-pair cable.

### Simple configuration.

Due Fili Plus technology ensures really simple programming. The installer can programme the outdoor station directly from the indoor station. Once the indoor station has been encoded, the system can even simulate an audio/video call from the outdoor station, to check whether installation was successful straight away.

### Remote management by smartphone and tablet.

Combined with the **Tab 7S Up** and the **Tab 5S Up**, the **Video Door App** allows you to receive a video entryphone call, see the video surveillance cameras or even open your door directly from your smartphone or tablet, wherever you are.

### Professionalism guaranteed.

Our professional, technologically sophisticated products are designed to guarantee superior performance and durability.

### Solutions for any building.

Our video door entry system solutions adapt to the most diverse application environments. Versatility and scalability, combined with sophisticated technology and ease of use, are all distinguishing features which make them suitable for the smallest apartment to large shopping centres and executive compounds, through to large residences.

# More functions and even easier to use thanks to the updated **Video Door App**.

**Video Door** App enables the remote control of the video door entry functions for **Due Fili Plus** and **IP technology**.

**The new Tab 7S Up and Tab 5S Up versions and the restyled Video Door App are the winning combination:** they can safely manage up to 5 different video door entry systems, for instance your main home, your holiday home, the office and your relatives' homes too. And calls can be forwarded to up to 10 different users. To enjoy life and get out and about freely and with peace of mind, without ever losing sight of what's going on in your space.

## Outdoor stations, communicating is easy, effective and safe. As well as stylish.

The **entrance panels** are available in various dimensions and can be mounted in various ways, but they all have one thing in common:

an elegant and sophisticated design in keeping with the most demanding architectural requirements.

Surface mounting or flush mounting entrance panels, monobloc, modular or special flush with the wall. Their design can differ to accommodate any installation requirements, to blend in seamlessly with the building's existing style.

### Pixel and Pixel Heavy.

Just 10 cm wide, affording simple installation in compact spaces. In audio/video or audio only versions, Pixel and Pixel heavy are characterised by their extensive modularity which provides complete customisation, combining different types of push buttons and a 3.5" colour LCD display.

### Pixel Up.

Entrance panel with front cover plate made of 316 stainless steel with brushed finish, distinguished by a linear design and by a reduced protrusion from the wall, of just 3 mm. With alphanumeric keyboard, with stainless steel buttons and colour display with polycarbonate protective glass, with IP54 degree of protection and IK08 impact resistance.

### Steely.

Boasting a design that is trendy, linear and simple. It is the perfect solution for innovative environments complementing a comprehensive range of stylistic requirements, building types and functional needs. Steely by name, steel by nature. A simple, hard-wearing material that characterises the DNA of the entrance panel and complements its contemporary, modern and technological style.

### Patavium.

Sinuous curves, beauty and sophistication, ideal for refined environments as it adapts to suit all types of architectures, particularly historical buildings. In brass with an elegant satin finish, also available on request in a polished version to enhance and endow every space with its very own personal form of expression.

### Series 1200 and 1300.

With soft and modern silhouettes and a scratch-resistant finish, suitable for any domestic context. Series 1200, in stainless steel with embossed surface and series 1300, in electro-polished anodised aluminium.

## Indoor stations, communicate with the outside world, by home and even remotely, in total safety.

The **indoor video door entry system** stations - hands-free or with a handset - stand alone or integrated in the By-me Plus home automation system, feature exquisite, modern, prized finishes and are thinner than traditional devices. The full range of indoor stations, both for door entry and video door entry systems, designed to elegantly adapt to the widest range of living styles. Top-quality materials, stylish silhouettes, prized finishes for functional styling and totally user-friendly operation.

### Tab 7S Up and Tab 5S Up.

With integrated Wi-Fi and 7" or 5" touch display, Due Fili Plus. Light weight and understated silhouettes distinguish all the models in the Tab series. Thanks to the integrated Wi-Fi, with the restyled Video Door App for total control from your smartphone even when you are out and about.

### Tab 7S and Tab 7.

Inspired by the light weight and understated silhouettes that distinguish all the models in the Tab series. The Tab 7 video entryphone is available for IP and Due Fili Plus systems, while the Tab 7S with integrated Wi-Fi for IP systems, as well as the traditional video door entry functions, offers call repetition on your smartphone, thanks to the Video Door App, guaranteeing total control even when you are out and about.

### Tab 4.3 and Tab Free 4.3.

With 4.3" display and slim profiles. Tab Free 4.3 is designed to communicate with the outside in complete freedom while keeping your hands free and providing a generous view of the world outside your home. A compact and stylish video entryphone, with gentle silhouettes that soften the corners and extend across the entire smooth, glass-like surface.

### Tab jr. and Voxie.

Entryphones with handset or hands-free. Simple, for those seeking the basic essentials both the silhouettes and in the functions, devised for those who don't need the video function and they blend in with any lifestyle.

PIXEL

PIXEL HEAVY

OUTDOOR STATIONS

# Pixel e Pixel Heavy. Beauty and strength.

**Modular entrance panels with a slim, modern design**, Pixel in aluminium with four colour variants: grey, white, slate grey and anodised grey, and Pixel Heavy in zamak, with a single special sable grey finish, which offers greater weather and impact resistance, with degree of protection IK09, IK10 and IP54, constitute a timeless entrance panel. Affording extensive modular design possibilities and freedom of composition, Pixel can be ordered specifically as you want it, responding perfectly to actual installation needs.

**Video camera with wide-angle lens.**

The audio/video module has a video camera with a wide-angle lens and high-definition recording. A zoom function can also be set from the indoor stations, where multiple recording windows can also be browsed.

**High sensitivity and automatic lighting control.**

The sensor sensitivity recognises guests even in poor lighting. The luminous intensity of the lighting LEDs is automatically adjusted according to the surrounding luminous intensity.

**Up to 4 push buttons in a single module.**

The audio or audio/video module, which is the heart of the panel, comes with 4 push buttons in two rows for installation in small residential contexts.

**Push buttons with LED backlighting.**

The call buttons have LED backlighting with white LEDs for maximum readability of names. Backlighting and the intensity setting is controlled by the integrated dusk/dawn sensor.

**Visual call signalling.**

An LED on the front indicates calls in progress and any active communications, whether the lock control is enabled, or a missed call if the line is busy.

**Echo canceller and noise reduction.**

Echo Canceller means you can have a natural, two-way conversation, automatically avoiding annoying audio feedback (Larsen effect). You will hear loud and clear thanks to the Noise Reduction function.

**Hard of hearing function and speech synthesis for visually impaired users.**

The hard-of-hearing function allows hearing aid wearers to listen to the conversations directly in the hearing aid; the voice synthesis allows the blind and poor-signed to listen to a specially recorded vocal message reproduced by the entrance plate for each command.

**Automatic gain control.**

Sound levels are always outstanding thanks to automatic gain control (AGC) and voice activity detection (VAD).

**Impact resistance and degree of protection.**

Pixel is an aluminium panel affording a high degree of protection against atmospheric agents (IP54) and against impacts (IK08). Pixel Heavy in zamak is even more resistant, with IK09 and IK10 ratings.

**Functional, ultra-slim design.**

Being just 100 mm wide and protruding from the wall by just 14 mm (Pixel) or 18.5 mm (Pixel Heavy), the panel's small, shape-enhancing dimensions enable it to be mounted on metal pillars, making it the ideal solution for confined spaces.

**Flexible, modular development, from 1 to 84 calls.**

Pixel and Pixel Heavy can be used to create various combinations according to need, starting from 1, 2 and 3 modules vertically and up to 3 rows horizontally, for a composition of 9 modules and allowing up to 84 calls with rocker buttons.

**Modular design.**

Owing to the availability of different-sized push buttons, Pixel can be composed freely to accommodate specific installation requirements.

Double axial button (one call)    Single axial button (two calls)    Double row single rocker button (four calls)

OUTDOOR STATIONS

# Pixel and Pixel Heavy.

Absolute modularity.

**Installation to suit your needs.**

Rapid front access to the audio/video unit and other expansion modules for routine maintenance without having to remove the panel completely from its mounting frame.

**LCD colour display and contacts list with up to 6400 names.**

With its 3.5" LCD colour display—the largest in the modular segment—and user-friendly navigation menu, it can manage up to 6400 names. Calls can be made by scrolling the contacts list or entering the required number. And with an 80° horizontal viewing angle, information can easily be read on the display even in direct sunlight.

**Expansion modules.**

Pixel is a dynamic solution, as it allows you to create all the compositions you need, using additional modules and combining audio or audio/video electronic units. Every panel can hold up to 5 button modules in a single row and 10 in a double row, complete with alphanumeric keyboard, display with electronic contacts list, or backlit name plate, biometric sensor or transponder.

**Flush-mounting in series or surface mounting with rain-proof frame.**

Pixel panels can be either flush mounting or surface mounting. In both cases, they guarantee great functional performance. For mounting in series, the flush mounting boxes are fitted with a spacer that secures them tightly together. In Pixel entrance panels, it works like a cable outlet because the void, watertight interior guarantees total protection for the wiring. Furthermore, a cardboard antimortar cover protects them during installation. Flush mounting can be completed by adding the rain-proof frame which is incorporated into the surface mounting boxes.

Flush mounting boxes for Pixel panels

Flush mounting boxes for Pixel Heavy entrance panels

**For installation with universal adaptors.**

Universal adaptors are designed to mount Pixel and Pixel Heavy modular panels to replace and renovate an existing entryphone or video entryphone system. Being universal, these adaptors are totally compatible with the most widely available flush mounting boxes on the market.

# Pixel Up.

## Slim and strong.

**Pixel Up is the entrance panel with front cover plate made of 316 stainless steel with brushed finish, with thin thickness and distinguished by a linear design and by a reduced protrusion from the wall, of just 3 mm.** Available in the version with alphanumeric keyboard, stainless steel buttons and colour display protected by 5 mm thick polycarbonate glass, it has protection degree IP54 and protection degree IK08 for impact resistance. For flush mounting, the entrance panel is supplied with a stainless steel box, to which the cover plate is fixed using special anti-tamper screws.

**Wide-angle camera.**

Camera with high-definition wide-angle lens. Recording range can be controlled directly from the indoor station using the pan&zoom function.

**Sensor: high-sensitivity and HDR.**

The high sensitivity of the sensor allows you to see even in areas with low brightness. The High Dynamic Range (HDR) technology in fact allows you to identify the caller even in poorly lit areas.

**Accessibility.**

The display features high-contrast colours to facilitate name identification and improve reading. The device uses large-sized characters and symbols, so it can also be used by the visually impaired.

**Backlit keyboard.**

Backlit stainless steel keys with Braille codes featuring multitap function for rapid name search.

**Automatic brightness setting.**

The intensity of the LEDs used for lighting the video camera is self-adjusting according to the environmental light, to ensure optimal visibility of the caller and the surrounding area.

**High performance 3.5" display.**

Wide viewing angle and backlighting that allow easy reading of information even in bright light. 5 mm thick polycarbonate screen protector.

**Composition.**

The 405x145 mm cover plate is fixed to the mounting box (382.1x124.1x60 mm) with special steel anti-tamper 6 screws. It can also be surface mounted using the dedicated box with rain-proof frame.

**Automatic gain control.**

Thanks to automatic gain control (AGC), sound levels are optimised irrespective of the distance and tone of the speaker, of the devices called and of the complexity of the system. There is no need to adjust the gain.

**Noise reduction and VAD.**

You will hear loud and clear thanks to the noise reduction function and voice activity detection (VAD).

**Echo canceller.**

The echo cancellation algorithm means you can have natural, two-way conversations, automatically avoiding annoying audio feedback or whistling (Larsen effect), without having to adjust the microphone and speaker during installation.

**Optical signalling.**

The entrance panel operations are signalled by graphic icons on the display and by the LEDs on the front of the cover plate, which show the call under way, the line busy, the conversation and the lock opening.

**Contacts list with up to 6400 names.**

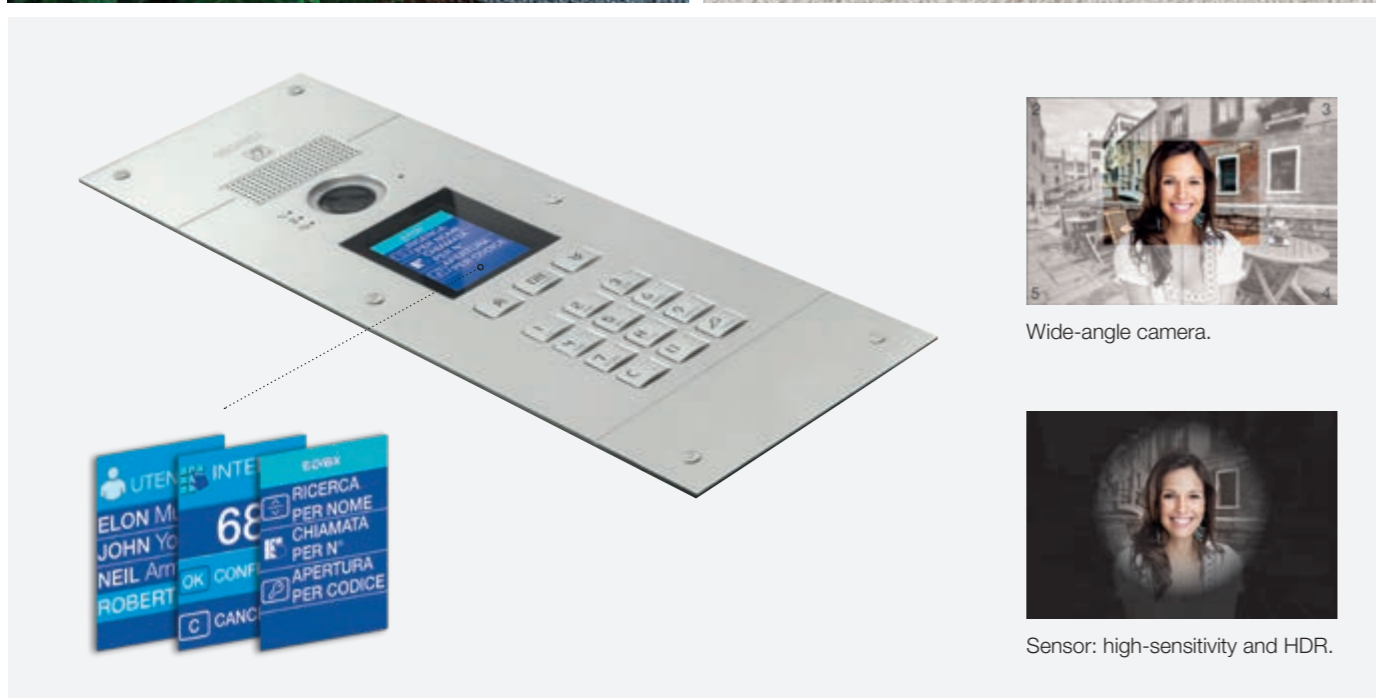

Thanks to a user-friendly navigation menu, the entrance panel can manage up to 6,400 names. Calls can be made by scrolling the contacts list or entering the required number.

**Integrated teleloop.**

Thanks to this technology, T-coil hearing aid wearer, can listen to conversations directly in their hearing aid.

**Voice synthesis.**

Entrance panel use by the visually impaired is facilitated, thanks to voice messages that guide the user step by step.

Wide-angle camera.

Sensor: high-sensitivity and HDR.

STEELY

PATAVIUM

OUTDOOR STATIONS

# Steely and Patavium. One design for every style.

**Two video door entry entrance panels, which differ in shape, finish and material, yet which have one thing in common:** sophisticated design, in keeping with the highest architectural expectations. These are the assumptions on which the new Patavium is based, combining the charming appeal of brass with rounded, elegant and timeless silhouettes, and Steely, in steel, modern and linear. Perfect for interpreting all styling and functional requirements.

**Steely: modern appeal and impeccable styling.**

Trendy, linear and simple. Three characteristics which - when combined with technological innovation - make Steely the perfect complementary feature for any building, accommodating all functional needs.

Made of steel, a simple, hard-wearing material that characterises the DNA of the Steely entrance panel and complements its contemporary, modern and technological style.

**Patavium: everlasting appeal.**

Golden reflections emphasise the sinuous curves for an ever trendy concept of beauty and sophistication. The brass used and the timeless design make it ideal in prestigious settings or combined with historical buildings.

In brass with an elegant satin finish, on request Patavium is also available in a polished version to enhance and endow every space with its very own personal form of expression.

**Camera with manual** vertical and horizontal tilt functions.

**Lighting of recording area** with white LED light.

**Full duplex communication.**

**The internal and external volume, and the sound balance** can be adjusted to obtain an optimum conversation volume.

**Fully modular.** Patavium and Steely can also be combined to suit individual requirements, placing the cover plates side-by-side horizontally, even vertically for Steely.

OUTDOOR STATIONS

**1200 and 1300 series.**  
Modular and versatile.

**Video door entry entrance panels, with common features yet with different materials, Series 1200 in stainless steel and series 1300 in anodised aluminium.** In audio and audio/video version, to be completed with electronic units, to arrange multiple combinations and adapt to any lifestyle to perfection.

Series 1200 and 1300 can be composed as desired, choosing between the audio unit and the audio/video unit, expansion modules with push button modules, display and alphanumeric keyboard. In the series 1300 cover plates, the blank modules can be replaced with traditional push buttons and vice-versa, so you can compose your keyboard to your liking.

**Series 1200: high performance and versatility.**

Fine finishes, high-performing yet concurrently user-friendly technology. Series 1200 can be flush mounted or surface mounted and is also available in a reinforced version, in sable grey satin-finish paint, which is particularly weather-resistant and offers a IK10 degree of protection against impacts, making it ideal for installation in saline environments.

**Series 1300: built to suit your needs.**

Soft design with scratch-resistant finish. Made from 1.8 mm thick electro-polished anodised aluminium. Designed both for flush mounting and for surface mounting with a rain-proof frame.

## Functions for extra control with the Video Door App.

### Very simple configuration.

In just a few steps, you can associate the Video Door App with the video door entry functions of your system thanks to the use of intuitive wizards.

### Intercom calls.

In addition to talking between two video door entryphones in the same building, thanks to the Video Door App - from each system manageable - you can also make calls to and from the associated mobile device. Immediate and direct dialogue with your home, but also with your loved ones who, if they need help, can call your smartphone directly from the video entryphone.

### Opening the entrance gate.

When you're not at home, but you need to let someone onto your property, you can open the gate from your smartphone or tablet. Problem solved.

### Activating auxiliary functions.

When on holiday or simply out and about, a simple tap on your smartphone or tablet will ensure your garden gets exactly the amount of water it needs, for instance; or you can open gates, garages and doors, turn on the lights in the garden or along the path.

### Controlling all the cameras.

The video entryphone or smartphone and tablet give you round-the-clock control over all spaces, and you can keep an eye on things at all times. You can view the images of the cameras associated with the system or activate the video entryphone camera, without anyone ringing at the door.

Quick guide to the right system solution

**Elvox IP video door entry system**

The system guarantees the functions described using the articles in the catalogue for all the following cases, also in combination:

- installation with less than 200 connected devices, i.e. objects connected to the same LAN network via an RJ45 interface, do not calculate IP CCTV cameras and switch;
- installation with up to maximum 3 video reception switchboards;
- management of access control services with standard articles from the catalogue up to 500 users;
- management of up to a maximum 10 video answering machine messages for each reception switchboard installed.

For all other cases and for the integration of third party products/systems, such as VoIP devices with SIP protocol, IP CCTV systems, advanced access control systems, please contact the sales network to consider customized solutions agreed with the system managers. The IP CCTV cameras can not be installed with the entrance panel to operate as call function service.

**Switch for the Elvox IP video door entry system**

The Elvox IP video door entry system should be completed with switch that manages the traffic of the LAN network. For a correct system operating, it is recommended the use of switch conform to the network characteristics of the current catalogue.

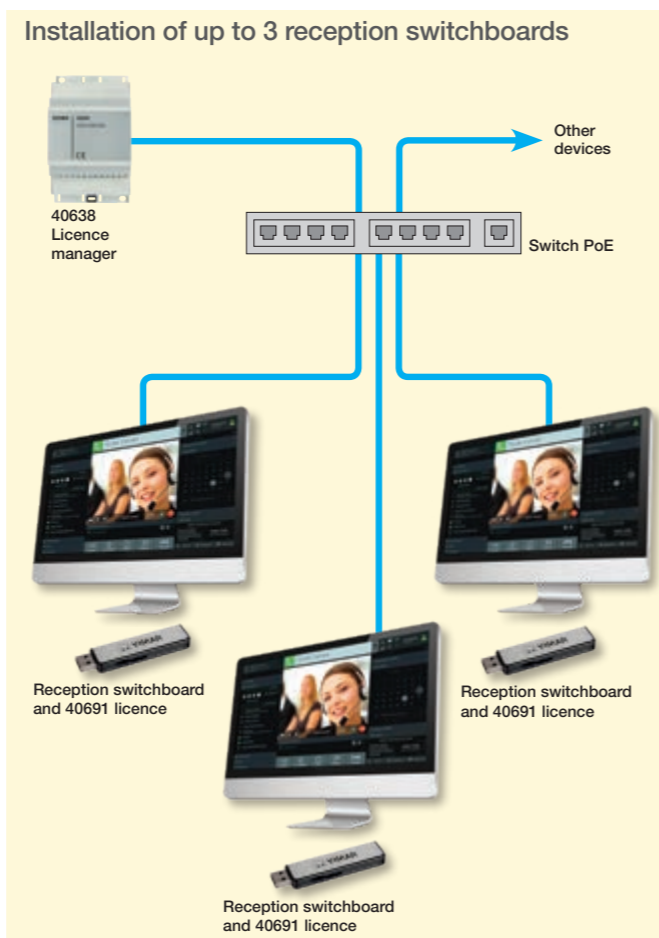

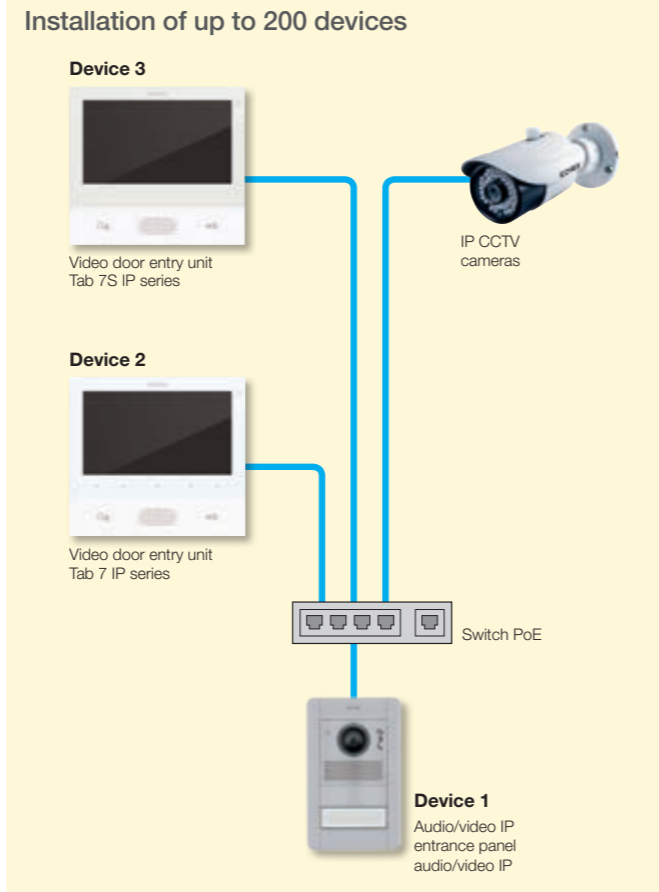

**Installation of the passive network**

To realize the infrastructure of passive network for the IP video door entry system, it is recommended to install the Vimar Netsafe structured cabling system with a wide range of products able to realize networks in 5e, 6 and 6A categories, shielded or unshielded in copper or fiber optic connections.

A system with great performances, offering versatile solutions for wide-ranging installations and assuring steady connections over time and for every kind of buildings, from the smallest in residential sector to the biggest to the tertiary sector.

## Quick guide to the right system solution

For renewing an existing or creating a new system it is necessary to define the type of system, to identify the various components required.

### Audio-only system (Due Fili Plus).

Basic system components:

- Entrance panel.
- Power supply and indoor unit (audio).
- In "audio-only" system, the wiring of the devices (entrance panel, indoor unit, power supply unit, etc.) is linear (in-out) or star-wiring.

#### With single entrance panel.

#### With multiple entrance panels.

## Quick guide to the right system solution

### Mixed systems (Due Fili Plus).

Basic system components:

- Entrance panel.
- Power supply and indoor units (audio + video).
- Linear wiring (in-out, no additional device needed).

In mixed systems (audio+video), for solutions with multiple audio and video external units, the concentrator is required.

In the case of indoor units, on the other hand, installations may use:

- Linear wiring (in-out, no additional device needed).
- Concentrator (combines multiple inputs).
- Wiring with floor distributor, allowing 4 outputs to be taken off the riser.

#### With single entrance panel.

#### With more than one entrance panel and in-out wiring.

#### With more than one entrance panel and floor distributor.

Due Fili Plus - Examples of standard systems

When set up a new systems or updating existing systems, the system type must be defined in order to identify the various components required. The components for each type of system can be fitted within certain distances, as follows:

- system components:
  - maximum distance between the indoor unit and the furthest entrance panel;
  - maximum distance between the entrance panel and the power supply;
- type and length of the cable.

The diagrams below show various system types, each indicating the relevant thresholds to be observed.

Type of cable

CABLE	ARTICLE	UNDERGROUND	AUDIO SYSTEMS	MIXED SYSTEMS
Elvox - section 1 mm <sup>2</sup>	732I.E.100, 732I.E.500	Yes	Recommended	Recommended
